BIOGRAPHY

Brandon Z. Hoff is the founder of RUDI and creator of Hoff Digital, a public education channel on responsible AI reaching nearly 100,000 community followers across TikTok, LinkedIn, YouTube, and Substack.

Trained in finance and a serial social entrepreneur, Brandon began his career building early machine-learning models for predictive lending and has since led applied AI work across real estate, financial analysis, education, and workforce productivity.

WHAT BRANDON SPEAKS ON

- AI literacy and responsible adoption for teams, educators, and executives
- Human-centered AI, governance, privacy, and responsible-use practices
- Applied AI for real estate, workforce productivity, finance, education, and product development
- The intersection of technology, social impact, economic mobility, and cooperative economics
- Community-centered AI adoption and practical implementation strategy

HIGHLIGHTS

AfroTech 2025

Featured keynote - Tech Conference - Houston - 2025

Featured keynote on responsible AI adoption at one of the largest gatherings of Black technologists in the country. Covered by Technical.ly in their conference recap.
